Zero tolerance Info: NHS number, D.O.B, date of sample: If any of this information is not on the card or is incorrect it will be rejected and a repeat will be requested. It is the responsibility of the person completing the card to find this info so screening isn't delayed.

Routine Info: This information should be easily available for each patient, if any of this information is missing the card will not be rejected, but the labs will have to contact the ward to chase up the information. This could delay screening. Please include details of transfusions, this info is essential to ensure accurate screening.

Non-essential info: Mums NHS number etc.
If this information is missing the card will still be screened so don't delay screening to obtain this information, but if you have it please include it.

Please check screening card expiry date.
